About Us

Established in 2014, Shenzhen Oranth Technology Develop Co., Ltd. is an industry leader specializing in research, development, production, integration, and sales of OTT and IPTV boxes.

Located in Shenzhen, our factory covers 4000m² with advanced production lines for assembly, packaging, testing, and SMT workshops. With a professional R&D team, we provide comprehensive ODM/OEM customization services, including PCBA design and software/hardware customization. We have more than 30 hardware and software engineers who are capable of developing customized solutions utilizing Amlogic, Allwinner, and Rockchip technologies. Our new business direction offers customers one-stop solutions for product planning, development, material procurement, production, processing, testing certification, and after-sales service.

Oranth stands as the original manufacturer and brand owner of the globally recognized Tanix TV Box, renowned for its outstanding reputation.

Middleware Oranth TV

The most comprehensive OTT/IPTV platform | Integrated solution | Mobile TV application | Multi-scenario | Global CDN.

Our product line will now include expanded middleware support for M3U, Xtream, Stalker, and other protocols, catering to the diverse needs of IPTV customers. This strategic development is designed to significantly enhance the overall user experience, ensuring seamless compatibility with a wide range of platforms and protocols.

- Advertising (management system)
- Smart home and Internet of Things
- Live TV and interactive broadcasting
- News and notifications
- User management
- Subscriptions and billing
- Shopping TV
- Cloud gaming
- Video on demand (VOD)
- Multi-screen clients (iOS, Android, PC)
- Channel management
- Application integration

Terminal Management System(TMS)

We have developed the next-generation Terminal Management System that enables IPTV/Signage operators to manage their client boxes easily. This system allows for functions such as activating/deactivating boxes, troubleshooting, and retrieving logs. It also facilitates the deployment of applications and broadcasting information.

For signage operators, it allows them to schedule each box's operation time and monitor their status.

Tanix Certifications

Tanix provides all the essential licenses and certifications required for each customer in their territories. We focus on offering products that maintain a high level of compliance with all relevant industry standards. Any special requirements can be fulfilled on a project basis.

We are compliant with many worldwide standards including:

- 01 **ISO9001 Certificate**
Ensures product quality, consistency, and customer satisfaction through strict quality management.
- 02 **Digital Rights Management (DRM) Certification**
Widevine L1 DRM: Provides advanced content protection, allowing content providers to securely distribute.
- 03 **HDMI Certification**
HDMI: Provides a reliable and high-quality connection for audio and video output.
- 04 **CE and FCC Compliance**
CE/FCC: Android TV box meets regulatory requirements for safety, electromagnetic compatibility, and other essential standards.
- 05 **Wi-Fi Certifications**
Certifications for wireless connectivity ensure that the Android TV box meets industry standards for wireless communication.
- 06 **Environmental and Health Protection**
REACH: Production and use of chemical substances.
